Two, Three or Four Tire Revolution Systems (Custom Lengths Available)
Width Can Accommodate Any Size Of Heavy Equipment
Undercarriage Wash Reduces Long Term Wear On Chassis Components
Back Wash Flushes Any Solids Off The Exit Ramp
Turbowash For Extra Wash Power With Dual Tire Vehicles

The HERCULES Series delivers the most durable wheel wash system on the market and is ideal for permanent applications. Assembled on site, this system consists of a concrete substructure and center sections for the wash platform and concrete stem walls, coupled with galvanized steel side walls. Typically, the HERCULES Series is installed with a three compartment concrete water recycling and solid separation tank. The tank is designed with one sloped compartment to allow solids to be removed with a front end loader. Tank can also be designed to have solids removed with a backhoe or a scaper conveyor.

## HEAVY EQUIPMENT WASH SYSTEM TRACKED & TIRED VEHICLES

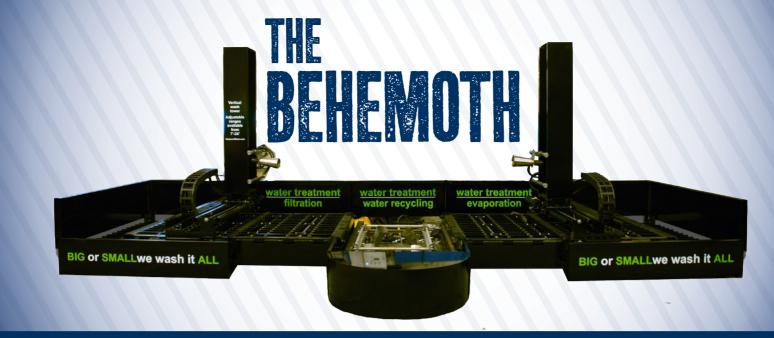

Use On All Types Of Wheeled Equipment - Wheel Loaders, Haulers, Scapers, Etc.

Closed Loop Recycled Water - Solids Removed With A Scraper Conveyor Reduces Maintenance Costs and Increases Uptime

## THE BETTER SOLUTION - NEPTUNE'S HIGHLY POWERFUL & EFFECTIVE EQUIPMENT WASH
